This weight and balance document modifies past existing weight and balance data contained in the aircraft records. This facility cannot verify that the existing weight and balance data contained in the aircraft records reflect the correct weight and balance of this aircraft. Any inaccuracies in past data will be mathematically carried forward with this document. This facility recommends that aircraft be re-weighed every 36 months to establish weight and balance continuity. It is the responsibility of the airplane owner and/or pilot to ensure that the aircraft is loaded properly for flight.

Authorized Individual : VFAR714K Peter Stelzenmuller
